Intern

Fusemachines Nepal Pvt. Ltd | May 2021 - Aug 2021

- Learn and did tasks of core java, spring boot framework, and MongoDB
- Learn web scraping in Java using jsoup
- Used Mockito to do unit testing and swagger to write API documentation
- Done one final full stack project with different groups of interns (ui/ux intern, frontend intern, and backend intern) as a team
- Stack used: java, spring boot, MongoDB
- Documentation and testing: Mockito and JUnit, swagger

PROJECTS

Expenses Tracking System

Ruby on Rails(Hotwire), PostgreSQL

It is a personal project, to manage my daily expenses and to learn and become familiar with new technologies in Ruby on Rails, such as Hotwire, stimulus js, and explore other features and tools that I am not familiar with.

HRM Clone

Spring boot, MongoDB

HRM is an API created by using spring boot and MongoDB. HRM API is used to track an employee's leave and holiday in an organization and apply for a leave.

Other Project

- Mero Sahar: Java, Mysql
- Quiz: Laravel, MySql
- [LCBN: React](#)
- [Real Chat : React](#)
- School Management System: C#, MySql
- Online Book Store: ASP.NET, MsSql
- Online Book Shop: Php, MySql
- Movie Review API: Rails, PostgreSQL
- IP Address Tracker: Angular
